

856 Mobile Bleachers

Intended for outdoor courts.
Easily to assemble and disassemble.

Bleachers consist of repeatable parts – modules, that can be connected and configured composing bleachers with optional (multiple of number 4) quantity of seats.

Bleachers feature two, three, four or six rows of seats, made of modules in lengths of 2m, 4m or 6m completed with stairs with length of 1,2m and rails.

Framework is made of steel, welded with each other profiles and plates. Side and back rails are made of profiled tubes. Flooring is made of grating. The whole construction is hot zinc coated with plastic sport seats installed.

Bleachers should be placed on hardened ground. The construction is reinforced with brackets to increase the stability of bleachers.

Compact size for transportation, possibility of configuration, removing and quick installation make this product ideal for occasional events.

Our bleachers are absolutely safe, comply with EN 13200.
